What We Do

The Project Management Foundation for Success course is an online, self-paced, 40-hour, twelve-module comprehensive course that provides content that aligns with the Project Management Institute Inc. (PMI) "A Guide to the Project Management Body of Knowledge (PMBOK® Guide)". This guide is a recognized and accepted standard of knowledge as related to project management worldwide.

Our Objectives

- Define project management.
- List the steps in the Project Life Cycle and the value/purpose of each one
- Identify how a project gets started
- Perform the steps required to determine the Critical path for a project
- Define Project Management in the context of business
- Define the components of the Success Triangle and define common terms used in Project Management
- Differentiate between various strategies for involving and engaging Stakeholders
- Calculate the true cost and effort that it takes for a project to be successful

Why Should You Purchase This Course?

- This course provides insight into all of the critical components of Project Management. The goal of this course is to provide project management methods, skills, tools, and techniques so you can successfully plan and manage projects that provide value to any organization
- When you choose project management as a career path, you could easily start as a project coordinator and quickly transition into some junior project management roles. After this, you can climb the ladder to manage your own projects and, with time, expand your skills to tackle more extensive and complex projects. You will not need many years of experience for you to make the leap to managing programs and, eventually, portfolios.
- PM professionals draw attractive compensations because of their capabilities to take up challenges in some of the most complex scenarios. When you are employed in project management you can attract a competitive salary that will offer long-term stability.

Why Project Management

- Project management is a skill that assists individuals in providing meaningful, worthwhile, and positive contributions to an industry or company.
- As project managers, learners will feel rewarded when schedules are kept on track, budgets are met, and collaboration is done with colleagues to ensure everything runs efficiently.
- Project managers help companies improve efficiency and save money to improve an organization's performance as a whole.
- If learners want to pursue a career that allows them to feel fulfilled, working in project management will greatly enhance their professional life. They will feel stimulated and challenged in a position that will enable them to change industries and benefit anyone around them with the unique skills they develop.

Our sessions are designed to help you

Students can acquire micro-credentials in Certificate in Blockchain, Bitcoin & Cryptocurrency which will help give them an edge in today's competitive workforce.

Here's what our students have to say

"As a professional already working in the field of corporate social responsibility (CSR), I found the material to be easily applicable to my real-world goals and objectives while also providing me with new additional resources to pull from. As a result, this course will "level up" every student, whether new to the profession and looking for a foundational understanding, or a seasoned expert looking to formalize their work."

Cindy Pope, Corporate Social Responsibility Specialist - ANLB

"The synchronous learning sessions fit well with my work and home life while still allowing for an open, engaging and professional remote learning experience. The instructors brought a wealth of knowledge and experience, and the other course participants also enriched the course and class time with their personal experiences and knowledge in the field of renewable energy. This training was exactly what I was looking for..."

Loretta Ransom, Advisor, Energy Funding, Research and Development, Energy Division, Dept. of Infrastructure, Government of the Northwest Territories.

"Taking the renewable energy series was an encouraging experience. In a world that desperately needs more opportunity for education there are very few options that are attainable for people... The course structure was very clear and concise. We had scheduled evening class time meaning I never had to give up work time, forums and boards make connecting with other students easier, and the instructors made themselves available at all times."

Luke Cecelon, Telecontrol Trainee
